

YINING JIAO

SN204, 232 S Columbia St, Chapel Hill, NC 27514

☎ 919-338-3976 ✉ jyn@cs.unc.edu 🏠 <https://jiaoyining.github.io/> 🌐 <https://github.com/jiaoyining>

Summary

AI/ML researcher with 6+ years of experience in (3D) computer vision, representation learning, and data science. Problem solvers in interdisciplinary studies. Dedicated to developing interpretable, versatile, and efficient AIs.

Education

The University at North Carolina at Chapel Hill

Ph.D. in Computer Science

Aug 2020 – May 2025(Expected)

Chapel Hill, NC, U.S.

Shanghai Jiao Tong University

M.S. in Biomedical Engineering

Sep 2017 - Mar 2020

Shanghai, China

Northwestern Polytechnical University, Honors College

B.Eng. in Electronic Science and Technology

Sep 2013 - Jun 2017

Xi'an, Shanxi, China

Experience

The Biomedical Image Analysis Group at UNC-Chapel Hill

Research Assistant, Advisor: Prof. Marc Niethammer

Aug. 2020 – Present

Chapel Hill, U.S.

- **Pediatric Airway Shape Analysis** Developed and maintained the whole image processing pipeline for pediatric airway shape analysis, including the *UNets*, *transformers*, and *implicit representations* for image segmentations, landmark detection and geometric data analysis/visualizations of diseased and normal pediatric airways for medical discoveries.
- **Airway OCT Segmentation and Geometry Reconstruction** Developed the first automatic image processing pipeline to extract 3D geometries from airway OCT images, by benchmarking *UNets* and *transformers* on OCT segmentation task; and then implemented *neural representation* for geometry reconstruction from the airway point clouds; leading to *the error* < **70 micrometers**.
- **Interpretable Shape Modeling** Proposed and developed interpretable neural shape representations for scientific shape analysis; designed and implemented experiments to validate the *SOTA-performance* and versatile capabilities of the proposed method; wrote up and made it publish on a top machine learning conference.
- (ongoing) **Multi-modal Implicit Representation** Develop multi-modal neural representations to represent images, geometries, and different types of annotations in a unified and versatile model as a solution to better handle data missingness for smoother multi-institutional collaboration.

United Imaging Intelligence

Research Intern, Mentor: Dr. Zhong Xue and Prof. Dinggang Shen

Oct 2019 – May 2020

Shanghai, China

- **Kaggle Challenge** Applied *EfficientNet* for the hemorrhage detection for Kaggle RSNA Intracranial Hemorrhage Detection Challenge, *awarded silver medal (top 4% of 1k+ teams)*.

The Medical Image Computing Lab at Shanghai Jiao Tong University

Research Assistant, Advisor: Prof. Qian Wang

Sep 2017 – Mar 2020

Shanghai, China

- **cuRadiomics** Developed a CUDA-based tool for fast computation of Radiomics features, boosting the computational efficiency by **100×**.
- **Data Science for Cancer Research** Applied *statistical analysis*, *survival analysis*, and *machine learning models* for treatment outcome prediction of prostate cancer and osteosarcoma, cervical cancer classification, diagnosis of Parkinson's disease, etc; summarized the discoveries and published several journal papers.

Computer Science Department at Northwestern Polytechnical University

Research Assistant, Advisor: Prof. Wei Wei and Prof. Lei Zhang

May 2016 – Jun 2017

Xi'an, Shanxi, China

- **Convex Optimization for Image Denoising** Implemented a method based on convex optimization for hyperspectral image denoising; conducted quantitative and qualitative evaluations to prove its *SOTA-performance*.

Skills

Programming: Python, C/C++, CUDA, Git, Scripting (Bash), LaTeX

Software: Pytorch, Tensorflow, ITK, Scikit-learn, Pandas, Linux

Language: English(fluent), Chinese(native), Japanese(advanced beginner)

Honors

| | |
|---|------|
| ICML Workshop on Computational Biology Fellowship | 2021 |
| Outstanding Graduate of Shanghai (only 4 from department) | 2020 |
| SJTU Excellent Graduate Student Award (only 2 from the department) | 2019 |
| Silver Medal, Kaggle RSNA Intracranial Hemorrhage Detection Challenge | 2019 |
| Excellent Undergraduate Thesis in NWPU | 2017 |

Academic Activities

Journal Reviews: IEEE Journal of Biomedical and Health Informatics, Neural Networks.

Conference Reviews: ICCV 2021, CVPR 2022, ICCV 2023, ICCV 2023, MICCAI2024.

Talks

- Radiomics-Driven Deep Reinforcement Learning in Detecting Brain Tumor Lesions
SJTU Graduate Student Academic Forum, July 2019. **1st Prize in Oral Presentation Group**
- Can Radiomics Features Boost the Performance of Deep Learning upon Histology Images?
International Conference on Medical Imaging Physics and Engineering, November 2019. **Excellent Paper Award**
- ConvRadiomics: Convolutional Radiomics Feature Extraction Toolkit
International Conference on Medical Imaging Physics and Engineering, November 2019.

Teaching and Leadership

School of Biomedical Engineering at Shanghai Jiao Tong University

May 2019 – August 2019

Teaching Assistant, Advisor: Prof. Qian Wang and Prof. Lichi Zhang

Shanghai, China

- Led 4 undergraduates to develop a software for Radiomics feature extraction, data analysis and visualization.
- Organized presentations and exams in the *Computer Vision in Biomedical Engineering* course.
- Advised 2 international exchange MS students with their academic research and paper writing.
