## I Research Highlights

I am a postdoc Scholar at UCSD. I build AI that knows what it knows — and recognizes what it doesn't. My research focuses on spatiotemporal representation learning, with a dedication to interpretability and uncertainty quantification within the healthcare domain. My work revolves around three questions:

- ⌚ Learning to see shapes — advanced techniques for image and geometry processing.
- 👤 Learning to model populations — representing how anatomical shapes vary and evolve.
- 📊 Learning to say "I don't know" — statistical machine learning for robust uncertainty quantification.

## I Education

2020–2025	<b>Ph.D. in Computer Science, UNC-Chapel Hill</b> Advisor: Prof. Marc Niethammer
2017–2020	<b>M.S. in Biomedical Engineering, Shanghai Jiao Tong University</b> Advisor: Prof. Qian Wang
2013–2017	<b>B.Eng. in Electronic Sci. &amp; Tech., Northwestern Polytechnical Univ., Honors College</b>

## I Research Experience

2026–Present	<b>Postdoctoral Scholar, UC San Diego</b> Advisor: Prof. Marc Niethammer <ul style="list-style-type: none"><li>➤ Individualized spatiotemporal learning; uncertainty quantification for shapes.</li></ul>
2020–2025	<b>Research Assistant, Biomedical Image Analysis Group, UNC-Chapel Hill</b> Advisor: Prof. Marc Niethammer <ul style="list-style-type: none"><li>➤ <b>Pediatric Airway Shape Analysis:</b> Developed and maintained the full image processing pipeline — deep-learning-based segmentation, landmark detection, geometry processing, and clinical visualization of pediatric airways.</li><li>➤ <b>Airway OCT Segmentation &amp; Reconstruction:</b> First learning-based system to extract 3D geometries from airway OCT scans; benchmarked UNets and transformers; <math>&lt; 46 \mu\text{m}</math> reconstruction error.</li><li>➤ <b>Interpretable 3D Shape Modeling:</b> Developed interpretable neural implicit shape representations for scientific shape analysis. <b>ICLR 2024 Spotlight · top 5%</b></li><li>➤ <b>Uncertainty-Aware Spatiotemporal Learning:</b> Built LucidAtlas, a unified probabilistic atlas framework for covariate interpretation, individualized prediction, longitudinal growth modeling, variance estimation, and OOD detection. Introduced marginalization theory for incomplete covariates.</li><li>➤ <b>Uncertainty Quantification in 3D Shapes:</b> Developing PRISM, the first framework to model uncertainty in neural implicit shapes via Fisher Information, pioneering uncertainty-aware implicit modeling in computational anatomy.</li></ul>
2019–2020	<b>Research Intern, United Imaging Intelligence, Shanghai</b> Mentor: Dr. Zhong Xue & Prof. Dinggang Shen. Applied EfficientNet for Kaggle RSNA Intracranial Hemorrhage Detection Challenge — <b>silver medal (top 4%, 1,345 teams)</b> .
2017–2020	<b>Research Assistant, Medical Image Computing Lab, SJTU</b> Advisor: Prof. Qian Wang <ul style="list-style-type: none"><li>➤ <b>cuRadiomics:</b> Developed a CUDA-based tool for fast computation of Radiomics features, <b>100× speedup</b>. <b>RNO-AI 2019 Oral · top 10</b></li><li>➤ <b>Data Science for Cancer Research:</b> Applied statistical analysis, survival analysis, and machine learning for treatment outcome prediction; published in <i>European Radiology, Cancer Mgmt. &amp; Research</i>.</li></ul>

- 2016–2017    **Research Assistant, Northwestern Polytechnical University**  
 Advisors: Prof. Wei Wei & Prof. Lei Zhang. Implemented convex optimization for hyperspectral image denoising; published in *IEEE Trans. Geoscience and Remote Sensing*.

## I Selected Publications

1. Y.Jiao et al. “PRISM: A 3D Probabilistic Neural Representation for Interpretable Shape Modeling.” *Preprint*, 2026.
2. Y.Jiao et al. “LucidAtlas: Learning Uncertainty-Aware, Covariate-Disentangled, Individualized Atlas Representations.” *Under Review*, 2025. [\[Paper\]](#)
3. Y.Jiao et al. “NAISR: A 3D Neural Additive Model for Interpretable Shape Representation.” *ICLR 2024*. Spotlight · top 5%  
[\[Paper\]](#) [\[Demo\]](#) [\[Code\]](#)

## I Other Publications

## I Technical Skills

**Programming** Python · C/C++ · CUDA · Git · Bash ·  $\text{\LaTeX}$

**ML / Scientific** PyTorch · TensorFlow · scikit-learn · Pandas · NumPy · SciPy

**Imaging / 3D** ITK · VTK · SimpleITK · Open3D · trimesh · 3D Slicer · ParaView

**Languages** English (fluent) · Chinese (native)

## I Honors & Awards

- |      |   |
|------|---|
| 2021 | ICML Workshop on Computational Biology Fellowship                     |
| 2020 | Outstanding Graduate of Shanghai (4 from department)                  |
| 2019 | SJTU Excellent Graduate Student Award (2 from department)             |
| 2019 | Kaggle RSNA Hemorrhage Detection Silver Medal (top 4%, 1,845 teams)   |
| 2017 | Excellent Undergraduate Thesis, Northwestern Polytechnical University |

## I Academic Services

**Conference Reviewer:** CVPR, ICCV, ECCV, NeurIPS, ICML, ICLR, AISTATS, AAAI, WACV, MICCAI

**Journal Reviewer:** IEEE TPAMI, IEEE JBHI, Neural Networks
